Presenter cheat sheet

Keys work only when armed (P) and not inside text fields. Source: RUN_SHEET.md, PRESENTER_KEYS.md

KEYS

P	Arm presenter mode, Stage theme, go to step 00
Space	Run the next step
←	Back one step
B	Play fallback clip (again = back to live)
R	Reset: restore tamper copy, clear boxes, step 00
L	Flip English / 简体中文
S	Stage theme on / off
?	Show key help
Esc	Close the source sheet; with no sheet open, hide / show the HUD

RECOVERY LADDER

1. **App stalls.** Ishaan says the next line's first four words; Dev presses B (clip plays).
2. **Wrong state.** Press R: restores the tamper copy, clears boxes, back to step 00. Never edits the real ledger.
3. **Network fails in the WorkBuddy beat.** Play clip C and say in one clause that it is a recording.
4. **Running long.** Cut in order: language flip, CodeBuddy line, Hy3 open-weight line, audit-row cut. Never cut the tamper or the identical refusals.
5. **Hy3 not live.** Keep the default line: "quoted from the sources, with the same checks".

A recording is never presented as live. If a judge interrupts: one sentence, then "let me finish this step, then I will come back."

STEPS 01 TO 10 (SPACE FOR EACH; P GIVES STEP 00, THE TITLE)

#	TIME	BEAT	SPOKEN CUE
01	0:07	**Same question, two truths**	"Watch." Both asks run. "Amy gets the approved script. Rachel gets the case. Same brain."
02	0:45	**Ken, identical refusals**	"Now Ken, a contractor. Velquarry on the left; a company that does not exist on the right."
03	1:10	**Passage, checked live**	"Every sentence points at a passage the asker can open right now."
04	1:40	**Journey**	"Mehul, over to the compliance officer's chair."
05	2:10	**Verify: intact**	"I am the compliance officer. Verify: intact."
06	2:20	**Tamper a copy**	"Now I change one word in a copy of the log, denied to allowed. Verify." Read the entry number off the screen.
07	2:35	**WorkBuddy (off-app)**	"Aaruni, Tencent." Alt+Tab to WorkBuddy; paste the one exact question. At 3:12 Alt+Tab back: the newest audit row appears; L flips language and back.
08	3:20	**Proof**	"7,374 adversarial requests, zero leaks. 400 paired questions, zero differences."
09	3:50	**Business**	"About 1.3 million US dollars a year, an estimate."
10	4:30	**Close**	"Answers you can prove. We want one pilot team. Scan to try it." Stop.

Morning checks: re-run the proof numbers; Hy3 is wired but the live run is pending, so say "quoted from the sources"; platforms are mocks; data is synthetic. The grow beat (?grow=1) is a Q&A walk-up only, never on the Space path. WorkBuddy question: What's the status of the database migration project and were there any blockers raised in Slack last week?
