# Presenter cheat sheet

Keys work only when armed (P) and not inside text fields. Source: RUN_SHEET.md, PRESENTER_KEYS.md

## KEYS

| | |
|---|---|
| P | Arm presenter mode, Stage theme, go to step 0 |
| Space | Run the next step |
| ← | Back one step |
| B | Play fallback clip (again = back to live) |
| R | Reset: restore tamper copy, clear boxes, step 0 |
| L | Flip English / 简体中文 |
| S | Slides: proof, business, close |
| ? | Show key help |
| Esc | Close source sheet, focus returns |

## RECOVERY LADDER

1. **App stalls.** Ishaan says the next line's first four words; Dev presses B (clip plays).
2. **Wrong state.** Press R: restores the tamper copy, clears boxes, back to step 0. Never edits the real ledger.
3. **Network fails in the WorkBuddy beat.** Play clip C and say in one clause that it is a recording.
4. **Running long.** Cut in order: language flip, CodeBuddy line, Hy3 open-weight line, audit-row cut. Never cut the tamper or the identical refusals.
5. **Hy3 not live.** Keep the default line: "quoted from the sources, with the same checks".

A recording is never presented as live. If a judge interrupts: one sentence, then "let me finish this step, then I will come back."

## THE 10 STEPS (SPACE FOR EACH)

| # | TIME | BEAT | SPOKEN CUE |
|---|---|---|---|
| 1 | 0:07 | **Same question, two truths** | "Watch." Both asks run. "Amy gets the approved script. Rachel gets the case. Same brain." |
| 2 | 0:45 | **Ken, identical refusals** | "Now Ken, a contractor. Velquarry on the left; a company that does not exist on the right." |
| 3 | 1:10 | **Passage, checked live** | "Every sentence points at a passage the asker can open right now." |
| 4 | 1:40 | **Journey** | "Mehul, over to the compliance officer's chair." |
| 5 | 2:10 | **Verify: intact** | "I am the compliance officer. Verify: intact." |
| 6 | 2:20 | **Tamper a copy** | "I change one decision in a copy of the log. Verify." Read the entry number off the screen. |
| 7 | 2:35 | **WorkBuddy (off-app)** | "Aaruni, Tencent." Alt+Tab to WorkBuddy; paste the one exact question. |
| 8 | 3:12 | **Back to the audit row** | "Dev has not touched the mouse all demo." L flips language and back. |
| 9 | 3:20 | **Proof slide** | "5,958 adversarial requests, zero leaks. 400 paired questions, zero differences." |
| 10 | 3:50 | **Business, then Close** | "About 1.3 million US dollars a year, an estimate." Then: "Answers you can prove. We want one pilot team. Scan to try it." |

Morning checks: re-run the proof numbers; Hy3 is wired but the live run is pending, so say "quoted from the sources"; platforms are mocks; data is synthetic. WorkBuddy question: What's the status of the database migration project and were there any blockers raised in Slack last week?
